

Product Data Sheet

Optimin® Manganese 15%

General

Optimin Manganese 15% is the product resulting from the chelation of a soluble inorganic manganese salt with amino acids and/or partially hydrolyzed protein. When used as a commercial feed ingredient, it must be declared as the specific metal proteinate: i.e., Manganese Proteinate.

Optimin Manganese 15% is a nutritional feed additive for livestock, fish and companion animal diets and effectively supports the manganese status of the animal.

Main Ingredient

- Manganese proteinate (IFN) 6-16-834

Specification

- Total Manganese min. 15% (guaranteed analysis)
- Moisture max. 8% (in original unopened bag)
- Appearance powder
- Color light cream
- Odor characteristic

Recommended Feed Rate

Optimin Manganese 15% should be fed at a supplementation rate between 25% and 50% of the daily requirement, depending on the basal manganese supply of the feed and on the degree of dietary or physiological challenges to the manganese status.

Safety

Applicable safety information can be found in the Safety Data Sheet.

Storage

Storage: Above -10°C

Shelf life: Two years after production date based on advised storage conditions

Packaging

Dry products are generally available in:

- 25 kg net multiple layer paper bags with LDPE inlayer on a pallet
- Big bags
